

DAX Calculations for Flight Delay Dashboard

Section 1: Delay Metrics

1. Total Delayed Flights

Total Delayed Flights = COUNTROWS('full_flight_delays')

2. Short Delays

Short Delays = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[delay_category] = "Short")

3. Medium Delays

Medium Delays = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[delay_category] = "Medium")

4. Long Delays

Long Delays = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[delay_category] = "Long")

5. Total Delay Minutes

Total Delay Minutes = SUM('full_flight_delays'[departure_delay])

6. Average Delay Minutes

Average Delay Minutes = AVERAGE('full_flight_delays'[departure_delay])

7. Delayed Flights by Airline

Delayed Flights by Airline = COUNT('full_flight_delays'[flight_number])

8. Delayed Flights by Airport

Delayed Flights by Airport = CALCULATE(COUNT('full_flight_delays'[flight_number]), ALLEXCEPT('full_flight_delays', 'full_flight_delays'[departure_airport]))

9. Is Delayed

Is Delayed = IF('full_flight_delays'[departure_delay] > 15, 1, 0)

10. On-Time %

On-Time % = DIVIDE(CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[Is Delayed] = 0), COUNTROWS('full_flight_delays'))

11. Total Flights

Total Flights = DISTINCTCOUNT('full_flight_delays'[flight_number])

Section 2: Airport and Flight Distribution

12. Busiest Airport Flights

Busiest Airport = CALCULATE(COUNT('full_flight_delays'[flight_number]), ALLEXCEPT('full_flight_delays',

DAX Calculations for Flight Delay Dashboard

'full_flight_delays'[departure_airport]))

13. Least Busy Airport Flights

Least Busy Airport Flights = CALCULATE(COUNT('full_flight_delays'[flight_number]),
ALLEXCEPT('full_flight_delays', 'full_flight_delays'[departure_airport]))

14. Status Count

Status Count = COUNTAX(FILTER('full_flight_delays', NOT(ISBLANK('full_flight_delays'[status]))),
'full_flight_delays'[status])

Section 3: Flight Status Counts

15. Active Flights

Active Flights = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[status] = "active")

16. Scheduled Flights

Scheduled Flights = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[status] =
"scheduled")

17. Cancelled Flights

Cancelled Flights = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[status] = "cancelled")

18. Landed Flights

Landed Flights = CALCULATE(COUNTROWS('full_flight_delays'), 'full_flight_delays'[status] = "landed")
